EDUCATION

Egypt British International School

- *IGCSE*
- Score: 100%
- 2020 - 2023

German University in Cairo

- Bachelor's Program in Computer Science and Engineering
- GPA (German system): 1.4 (equivalent to an 'A-' grade)
- 2023 - 2028

EXPERIENCE

Software Engineer Intern

Market Scene - Marketing & Software

- Jan 2025 – March 2025
- Developed a cross-platform mobile application using **Ionic** and **Angular Framework**.
- Developed and deployed websites on a hosting service using **HTML, CSS, JavaScript, PHP, and MySQL**.
- Worked on real client projects, implementing both past and ongoing requests for the company's customers.
- Integrated **MySQL** databases for data storage and management.
- Collaborated with a team using **Git** and **GitHub** for version control.

PROJECTS & EXTRACURRICULAR

- **University HR Management System** — *Node.js, EJS, SQL Server* | [GitHub](#)
 - **Full-Stack Development:** Built a multi-user web application using **Node.js** and **EJS** to manage employee profiles, attendance, and payroll workflows.
 - **Database Engineering:** Engineered a complex SQL schema with 15+ tables and 30+ stored procedures for automated salary calculations and leave approval hierarchies.
 - **Business Logic:** Implemented role-based access for Admins, HR, and Academic staff, handling complex requirements like multi-level leave approval and payroll deductions.
- **Hardware Lab & Infrastructure** — Personal Project
 - **Headless Debian Server:** Repurposed low-spec hardware into a dedicated, 24/7 Linux server environment to host and manage personal development services.

- **Integrated Tech Stack:** Configured and maintained a production-ready environment including Java (Spring Boot), Node.js, and PostgreSQL, optimized for resource-constrained hardware.
 - **Secure Remote Access:** Implemented Cloudflare Tunnels (cloudflared) to securely expose internal services without opening firewall ports. Configured status.yassinsabek.dev as a live health-check gateway, providing real-time system metrics (CPU, RAM, Disk) via a custom Python-based API.
 - **Development Pipeline:** Established a remote workflow using SSH and VS Code Remote for seamless server-side API development and debugging.
 - **System Monitoring:** Managed hardware health, resource allocation, and service logs through the Cockpit web interface.
- **Jackaroo: A New Game Spin — Java, JavaFX, OOP, Algorithms** | [GitHub](#)
Developed a custom single-player adaptation of the traditional Jackaroo board game as part of a university project:
 - Designed and implemented a complete **game engine** in **Java**, applying core **object-oriented principles** including **encapsulation**, **inheritance**, **polymorphism**, and **interfaces**.
 - Developed a **JavaFX** GUI with accurate marble path mapping using **Point2D**, animations, and interactive visuals.
- [Link to All Projects](#)

CERTIFICATIONS

- **Java Spring Framework 6, Spring Boot 3, Spring AI**
Udemy – Telusko (In Progress)
 - Core & Advanced Java: **OOP**, **collections**, **exception handling**, **multithreading**
 - Hands-on course focused on building enterprise-grade backend applications using **Spring Boot 3** and **Spring Framework 6**.
 - Covers key topics:
 - **Spring Core**, **Spring MVC**, **REST APIs**, **Spring Data JPA**, **AOP**, **Spring Security**
 - **Authentication:** **JWT** implementation, **OAuth2** login (**Google** & **GitHub**)
 - **Persistence:** **JDBC**, **Hibernate ORM**, **One-to-One**, **One-to-Many**, **Many-to-Many** mappings, **HQL**, caching (**Ehcache**)
 - **Build Tooling:** **Maven** (setup, dependencies, **POM** structure, archetypes)
 - **Version Control:** **Git** & **GitHub** (commits, branches, merges, pull requests, rebasing)
 - **Cloud Deployment:** **Docker**, **AWS Elastic Beanstalk**, **AWS RDS**, **ECS**, **ECR**, and **AWS CLI**
 - **Intro to Spring AI**
 - **Course Link:** [link](#)

EXTRACURRICULAR ACTIVITIES

- **DevOps Committee Member** | **IEEE GUC Student Branch** | 10-2025 – Present

SKILLS

- **Programming Languages:** Java, JavaScript, SQL
- **Databases:** PostgreSQL, Microsoft SQL Server
- **Backend:** Spring Boot, RESTful APIs, Node.js
- **Frontend:** React, HTML5/CSS3
- **Operating Systems & Infrastructure:** Debian Linux (Server Admin), SSH, Bash/CLI, WSL2
- **Tools:** Git, GitHub, Cockpit, VS Code Remote, Postman
- **Languages:** Arabic, English, German (A2)
